

## **LUC MATHAN**

Luc has 15 years of international experience in the field of collaboration between telecommunication service providers.

In 2003 he started taking a more acute interest in the spam issue, when he joined Orange / France Telecom's Corporate Public Affairs, with responsibility for cybersecurity, spam and privacy issues. On the anti-spam issue, his objective was to identify, join and support the most representative anti-spam industry interlocutor that governments and international organisations were seeking. He therefore made Orange / France Telecom join MAAWG the year of its creation, in 2004, and he has been an active participant ever since. He represents or has represented MAAWG or Orange / France Telecom at many international meetings or organisations (GBDe, WSIS, OECD, BIAC, ITU, ETNO, ETSI, ETIS, Liberty Alliance, Council of Europe, the London Action Plan, etc). At MAAWG, he is both a member of the Board of Directors representing Orange / France Telecom, and co-chair of the MAAWG Public Policy Committee since 2006.

His day-time job in 2009 is manager of standardisation and regulatory affairs at Orange Labs, the R&D arm of Orange / France Telecom.

Luc received his education in Canada (McGill University BEng'85 and MSc'87, Computer Science) and in France (Ecole Nationale Supérieure des Telecommunications, PhD'91).
