

SHORT BIO

Pedro Marques Tavares

With more than 25 years of professional experience, Pedro is the EMEA Telecom Center of Excellence leader and has worked in several organizations of the Telecom sector, including Research & Development Institutes, Telecom Industry and Consulting. Throughout his career, Pedro developed and led several multi-country projects across the world namely in the US, South America, Europe, Africa, Middle East and Asia-Pacific.

Pedro's current main areas of expertise are network virtualization, automation, protection and 5G and it continues to evangelize the market, now around quantum networks and OpenRAN, collaborating with TM Forum in the development of best practices and standards.
