

ANNEX A

PRESENTATION AND ACCOUNTING OF INDICATORS TO SUBMIT QUARTERLY TO ANACOM (Indicators from tables I.1. to I.6.)

	Jan	Feb	Mar	1st Qtr	Apr	May	Jun	2 nd Qtr	Jul	Aug	Sep	3rd Qtr	Oct	Nov	Dec	4th Qtr	TOTAL YEAR
Indicator 1																	
Indicator 2																	
Indicator 3																	
Indicator n																	

Notes:

1. This information should be submitted to ANACOM within 30 days after the end of each quarter.
2. Each quarter, for all the defined indicators, the columns corresponding to the available monthly and quarterly figures should be filled out, **as well as the 'Total Year' column** (referring to each indicator's total value for the period running from the beginning of the year until the end of the quarter under review). The columns for the various indicators should be filled out according to the following criteria:
 - The total quarterly figure for the indicators regarding accesses should correspond to the accumulated value at the end of the last month of each quarter, with the 'Total Year' column coinciding with the total for the quarter under review.

- The total quarterly figure for the indicator 'number of customers' should refer to the last day of the same quarter, coinciding with the accumulated figure for the number of customers in the last month of each quarter (in the case of call-by-call selection and with respect to users who do not have a contract, only those who by dialling the provider's access code make at least one call during that last month will be accounted as customers).
- The quarterly value for the 'number of FTS access points' indicator should refer to the last day of the quarter, coinciding with the accumulated value of the indicator in the last month of each quarter (in the case of call-by-call selection and with respect to users who do not have a contract, only channels that were used to make at least one call during that last month will be accounted as access points).
- The remaining indicators (specifically on traffic and revenues) should not be submitted in accumulated terms; the quarterly totals should correspond to the sum of the monthly values and the 'Total Year' column is, for each quarter, to correspond to the sum of the quarterly values already verified.
