(1) Customers: users with a contractual relationship with the national FTS provider, who has been granted the right to originate and/or route traffic using its own network. In case of a call-by-call selection, the contractual relationship does not have to be established in writing, yet customers who have made calls in each month of the reference quarter shall be accounted for.

(2) The points of access in pre-selection regime correspond to the number of lines used through the pre-selection.

(3) Estimated values.

(1) Total main accesses corresponds to the sum of the indicators “number of analogue accesses” and “number of equivalent digital accesses” regarding direct access, including accesses installed at customer request, public payphones and the providers’ own accesses. The providers’ own accesses are the number of accesses for the providers’ own use (accesses belonging to companies with which the provider has a dominant or group relationship are not included in this group and are included in “accesses installed at customer request” instead).

(2) Includes voice traffic to fixed and mobile destinations and also outgoing international traffic.

(3) Includes voice traffic (fixed and mobile destinations and outgoing international traffic) and Internet traffic.

(4) Value subject to an update compared to the one provided in the scope of Determination of 17/07/03 on the establishment of a compulsory withdrawal period.
